

New Homes Proposal in Cairnsmore Area

It has come to our attention that there has been an application proposal submitted to Glasgow City Council for the Abbotshall Avenue area in Cairnsmore. The development would be social rented properties for Wheatly Homes Glasgow.

The proposal is to build 60-75 homes made up of a mix of flats and houses (it doesn't specify what the split is) with associated car parking and landscaping. The architects are Mast.

That's really all the information about the proposed development that we know at present, but we are looking to find out more and to ensure that the local community are part of any consultation.

We have asked for more details about community consultation and have been advised by MAST Architects as follows:

The application proposal states that consultation events will be held as follows:

There will be 2 sets of community consultations, both in person and on-line.
